in Building and Construction

Providing a global network for international exchange and cooperation in research and innovation in building and construction, in support of an improved building process and of improved performance of the built environment.

June 2010

CIB Student Chapters

Call for Proposals 2010

Purpose of this Award

This award replaces the former CIB Gyula Sebestyén Student Chapter Award.

The new name emphasizes that the foremost purpose of the Award is to expose future leaders of the building sector to the latest developments in building research, so that in later life they will understand the value of supporting good research.

CIB Student Chapters are encouraged to demonstrate in a Proposal how their student members have the potential to be future leaders in their chosen field of work and to understand the value of building research. It is intended that the Award will stimulate collegial cooperation between staff and students in the Chapters, and the free exchange of information between Chapters. Above all it is expected that the links between these Chapters and the already established senior researchers and research leaders in the CIB community will be strengthened.

Proposals

CIB Student Chapters are invited to submit proposals for activities for the 2010 CIB Sebestyén Future Leaders Award.

This includes the traditional CIB Student Chapters that are linked to one University, and also the National CIB Student Chapters and the International CIB Student Chapters that relate to a CIB Commission.

The Award for the winning proposal this year will be a sum of Euro 2500. In addition the CIB Secretariat will provide as much administrative and other support as is reasonably practicable for the execution of the Proposal.

Proposal Assessment

The judges, appointed by the CIB Board, will first assess the Proposals on the extent to which they are likely to contribute to:

- promotion of CIB and its objectives
- stimulation and facilitation of information exchange between existing CIB Student Chapters and the established senior researchers and research leaders in CIB Commissions
- establishment of new CIB Student Chapters
- stimulation and facilitation of cooperation between research and other activities carried out by students and staff related to CIB Student Chapters.

Proposals that focus on R&D themes will also be assessed by the judges for the clarity of their linkages with the CIB-defined Priority Themes, preferably the two newest Themes:

- Clients and Users
- Integrated Design and Delivery Solutions.

The judges will take account of:

- the practical feasibility of the Proposal as demonstrated in the proposal
- the probability that the project described in the Proposal will be completed within 12 months from the judges' decision.

Submission of Proposals

There are no fixed criteria for the format or medium used to communicate the Proposal to the judges, but the Proposals must be in a form that is suitable for convenient transmission to the judges by some means.

Intending entrants seeking inspiration should consult [here](#) to see examples of previously successful Proposal formats.

Note that Proposals should state a date on which a report on the outcome of the Proposal will be supplied to CIB for publication in a CIB Newsletter.

Proposals must be sent by e-mail to Bill Porteous, CIB Assistant Secretary General, at bill.porteous@cibworld.nl no later than 16 July 2010.

Announcement of the Winner

The entrant whose Proposal is judged to be the winner will be notified no later than 15 August 2010. The result will be published in the CIB Newsletter as soon as possible after that date. When the project is complete the authors' report on the outcome of the Proposal will also be published.
